

“Seeing other FileMaker solutions only increases my admiration for the amazing program you built for us!”

—Robin Allen
Studio Manager

Go to the next level with a database by Beezwax.

Reduce your costs

Optimize your company workflow with a Beezwax database solution. Improve your bottom line by eliminating busywork and replacing legacy databases.

Because you're special

Beezwax has customized hundreds of unique data environments for the specific needs of each client. Your office systems should match you, your business and your workflow.

Stay competitive in challenging times

Streamlining your processes allows you to better navigate when times are lean. Your organization becomes smarter, faster and better.

Why FileMaker Pro?

FileMaker Pro is a widely used cross-platform relational database application that can power virtually any database project.

Easy to use

An attractive, user-friendly interface

Affordable

Powerful development tools allow rapid deployment

Low ongoing costs

Stable platform ensures few sysadmin headaches

Scalability

Native support for MySQL, SQL Server and Oracle.

Cross-platform

Supports both Mac, PC, and mixed-platform environments

We can build it for you.

A respected industry leader with over six hundred successful FileMaker Pro projects under our belt, Beezwax has an unmatched track-record and expertise.

- A custom solution for your individual situation
- Integrated with your existing systems
- An easy-to-use visual interface
- Powerful and laser-sharp searching
- PC and Mac compatible
- Rock-solid data security and archiving
- Simple system administration
- Access data using the FileMaker client or via a web browser
- Share data among internal and/or external stakeholders
- Beezwax works closely with your internal IT or can handle it all. No tech experience required.

• Platinum Member of the FileMaker Business Alliance
• Certified since FileMaker Certification began
• FileMaker Beta-Testers since 2001

“Thanks again so much for the
vast improvement.
The automated functions
greatly facilitated reporting
to our donors and clients.

**This has saved an enormous amount
of staff time.”**

—Mary L.G. Theroux, *Vice President, The Independent Institute*

A BEEZWAX CASE STUDY

CALIFORNIA ALLIANCE FOR JOBS

Contact & Contribution Management System

The challenge

The California Alliance for Jobs is required to report on critical incoming economic data quickly and accurately. Their previous FileMaker system had a feature to automatically match imported data with existing data; however, its inaccuracy required hours of tedious double-checking.

The Beezwax solution

Instead of trying to improve a system based on old logic, Beezwax recommended a full redesign. Beezwax's own PIVOT template formed the core of the new solution, saving many hours of development time. Optimized for FileMaker 10, PIVOT's sophisticated structural foundation and feature-rich interface provided a superior environment for a streamlined workflow.

The success story

Beezwax reduced the run-time of the automated matching function from fifteen minutes to one minute, while vastly improving its accuracy. Further, we improved the review process by offering better visualization of possible matches, ranking them with a “relevance bar” — thus making the manual finishing process much faster and easier.

**“This new system is so easy
it's scary!
It is awesome
and saves me a ton of hours!”**

—Susan Stevens, *California Alliance for Jobs*

Over six hundred custom FileMaker projects completed.

- Contact management (CRM)
- Project management
- Time tracking and invoicing
- Asset management
- Reporting & data mining
- Accounting & budgeting
- Scheduling
- Event management
- Inventory
- Calendaring
- Publishing
- Fundraising
- Surveys
- HR
- Medical records
- Class registration
- Class curricula
- Legal data
- Scientific data
- E-commerce
- Contract management
- Royalties management
- Studio management
- Upgrading from old versions
- System normalization
- Security enhancement
- And much more
